

# ISO-NE & Regional issues update

vermont electric power company

August 2016

# Markets highlights

- August 11<sup>th</sup> IMAPP (Integrating Markets and Public Policy) meeting: Glimpse of some of the proposals:
  - Substation storage paid for by RNS.
  - Carbon fee for emissions
  - Power purchase agreements (state power authority)
  - Establish a shadow price adder based on carbon.
  - Separate market for procuring forward clean energy. Similar to the FCM, but purchasing clean energy.

# Reliability/planning highlights

- ISO going to look at clustering for wind projects in Northern Maine.
- Looking at providing cost data on Regional system plan for security programs.
